

Himanshu Menghani

Full Stack Developer

📍 Mumbai, India — 📞 +91 77699 49282 — ✉️ himanshumenghani524@gmail.com —  [linkedin.com/in/himanshumenghani524](https://www.linkedin.com/in/himanshumenghani524) —  github.com/524himanshu —  Portfolio

Summary

Full-stack developer with **1+ year of hands-on experience** building and shipping production-grade web and AI-powered systems. Delivered **5+ end-to-end applications** across React/Next.js, Flask/Django backends, and cloud platforms (Vercel, Render, Cloudflare Workers). Experienced in **LLM integrations** (Gemini, Claude, Llama 3.3), REST API design, async processing, and distributed architectures. Built a **Django/DRF + Celery + Redis payout engine** from scratch with zero prior experience. Strong focus on system design, scalability, and clean backend architecture.

Technical Skills

Languages: JavaScript (ES6+), Python, Dart, HTML5, CSS3, SQL

Frontend: React.js, Next.js (SSR/SSG/ISR), Flutter

Backend: Flask, Django, DRF, Node.js, Express.js, REST APIs, JWT, Middleware, Celery, Redis

Databases: MongoDB, PostgreSQL, Firebase, MongoDB Atlas

Cloud & DevOps: Vercel, Render, Cloudflare Workers, Railway, Docker (basic), Git, Postman

AI/ML: Gemini API, Claude API, Llama 3.3, Scikit-learn, Pandas, NumPy

Concepts: Microservices, RBAC, SDLC, Async Processing, CI/CD basics, System Design

Projects

Playto Payout Engine | *Django, DRF, PostgreSQL, Celery, Redis, React*

 [GitHub](#)  [Live](#)

- Built a **distributed payout system** using Django + DRF, delivered under deadline with zero prior framework experience.
- Integrated **Celery + Redis** for asynchronous job queues, eliminating blocking requests and improving system throughput.
- Designed **PostgreSQL schema** with transactional integrity, ensuring reliable and audit-safe payout workflows.
- Developed RBAC-based dashboards enabling **real-time payout tracking** for admins and end users.

AI Health Diagnostics Platform | *Next.js, Flask, MongoDB, Gemini API*

 [GitHub](#)  [Live](#)

- Built a production-grade AI system with **3 pipelines**: symptom analysis, report parsing, and diagnostic generation across Vercel and Render.
- Designed and deployed **5+ REST APIs** handling validation, sanitization, and LLM response orchestration.
- Implemented secure file ingestion pipeline for PDFs/images with multi-layer validation and failure-safe handling.
- Architected a **decoupled frontend/backend system** enabling independent deployment and scaling.

CF AI Career Coach | *Cloudflare Workers, Workers AI (Llama 3.3), Durable Objects*

 [GitHub](#)  [Live](#)

- Built an AI career assistant using **serverless edge architecture**, delivering resume scoring and role-specific feedback.
- Implemented **persistent conversation memory** using Durable Objects without relying on a traditional database.
- Designed stateless APIs ensuring **low-latency responses** and scalable request handling at the edge.

Student Portal | *Node.js, Express, MongoDB*

 [GitHub](#)  [Live](#)

- Developed a **role-based access control (RBAC)** system supporting Admin, Student, and Faculty workflows.
- Implemented session-based authentication with middleware-driven authorization and protected routes.
- Designed scalable MongoDB schemas and deployed the system on Render.

Parkinson's Disease Prediction | *Python, Scikit-learn, Streamlit*

 [GitHub](#)  [Live](#)

- Built an ML pipeline using **22 biomedical voice features**, achieving **94.87% accuracy** with Random Forest.
- Applied **5-fold cross-validation** and hyperparameter tuning to optimize model performance.
- Deployed an interactive interface reducing manual evaluation time by **~80%**.

Professional Experience

OctaNet Services Pvt Ltd. | *Web Development Intern*

Mumbai, India | Sept 2023 – Oct 2023

- Delivered **3+ responsive web pages** and a full task management application with prioritization, deadline tracking, and status management, completed all deliverables within the **2-month internship timeline**.
- Improved UI responsiveness across **2+ device breakpoints**, enforcing clean component architecture and consistent cross-browser styling.
- Collaborated on debugging and performance optimization — contributing to measurable reduction in page load time and elimination of critical UI render bugs.

Education

Bachelor of Engineering, Information Technology

Mumbai University

2021 – 2024

Higher Secondary Certificate (Science) 80%

Maharashtra State Board

2020 – 2021

Secondary Education (10th Grade)

Maharashtra State Board

2018 – 2019

Certifications & Achievements

- Develop GenAI Apps with Gemini and Streamlit — Google Cloud
- Introduction to Generative AI — Google
- Prompt Design in Vertex AI — Google
- INVICTUS’24 Hackathon — QuestIT Cell × ISTE VESIT
- 27 total certifications across Cloud, AI & Web Development — [View on LinkedIn](#)
